

Ski Masterclasses - Master the Mountain

Reach your peak and improve your skiing with Hotham's ski coaching sessions for advanced skiers.

Guided by Hotham's elite ski coaches, you'll master the powder, steeps, deeps, moguls, trees, or refine your carving style in the groomers. Each session is all about fine tuning your skills in specific ski disciplines, with a different focus in each session over the week.

Session focus

Carving

This is the session that will get you looking and riding like a pro who rips down the groomed terrain with their hips scraping the snow just like in the photos. You will be coached to improve your grip and speed on groomed terrain to rip those big carves. Angulation baby

Short turns

Strengthen your dynamic short turn technique by fine tuning your movement pattern, and harness the rebound-like playfulness of your short turns.

Moguls

Learn to love moguls and bumps! In this session you'll practice extension/retraction techniques and work on your line to show you how to get the most out of the moguls.

All terrain

You'll head off-piste to some of Australia's steepest terrain in the extreme zone and practice tactics for riding steep terrain and powder.

Master the Ice

Learn to use your edges to maximise grip and have control on the hard stuff.

Powder

Learn to stay on top of your skis/board and make perfect turns in the deeps.

Sessions are subject to snow conditions.
